2. **The online hotel room booking website allows users to search for hotels based on destination, dates, and number of guests, offering detailed listings with room options, prices, amenities, and reviews. Users can create accounts, log in, and manage their bookings through a user-friendly dashboard. The booking process includes checking room availability, filling out a booking form, and completing secure payments via an integrated payment gateway. Post-booking, users receive confirmation emails and can leave reviews and ratings. Admins manage hotel listings, room availability, and user accounts through a dedicated admin panel. The website is fully**

responsive, ensuring seamless access on all devices.

Functionalities:

Users.

1. Users can register at the hotel and then they can view or modify their profile.
2. Users can book a room on any specific date.
3. Users can view all their booking history at the hotel.
4. Users can change the booking at any time 3 days before the arrival date.
5. Users can cancel the booking at any time 3 days before the arrival date.
6. Users can check the room availability at the hotel before they book a room.

Administrator

7. Administrators can change the quantity and price of all four types of rooms.
8. Administrators can change any specific booking details.
9. Administrators can cancel any specific booking.
10. Administrators can modify the details of static pages including room information, about us information, contact us information, customer service Q&A details, local travel and shipping guide, and privacy policy after login.
11. It should also contain a basic room type introduction, contact information, customer service Q&A, local travel and shipping guide, and a privacy policy

3. **The online bus ticket booking system enables users to search for buses by route, date, and time, and view available seats. Users can create an account, log in, and manage their bookings through a personal dashboard. The booking process includes selecting seats, filling out passenger details, and making secure payments via an integrated payment gateway. Admins can manage bus schedules, seat availability, and user accounts through an admin panel. Users receive booking confirmation emails and can view their booking history. The website is mobile-responsive, ensuring easy access on all devices.**

Admin

In this system, the admin can maintain all the Bus information and maintain Bus category, comments etc.

In this system, the admin can maintain the registered users, manage news, and the admin cangenerate reports and manage the whole system.

Login:

Login Module includes various utilities like User Authentication, Change Password and Forgot

Password.

Registration:
This website provides some facilities users can be Registered in this website. user can use thisfacility so user can make a registration
.

Book the Ticket:
In this module, the admin can add a new bus category using this module. Bus Category contains like Volvo, Slipper coach, coach etc.

Update Bus Information:
In this module, the admin can add or Update Bus using this module. It contains information about the Bus type, photo, description, Location of the tour, Available Seats in Bus etc.

Cancel the Booking Ticket:
In this Module, the User can cancel the booking Ticket.

Comments:
In this Module, Users can Post Comments on a particular Bus.

Report Generation:
This module is used to generate a report.

4. The online train reservation system allows users to search for trains by route, date, and time, and view available seats and classes. Users can register, log in, and manage their reservations through a personal dashboard. The booking process involves selecting seats, entering passenger details, and making secure payments via an integrated payment gateway. Admins can manage train schedules, seat availability, and user accounts through a comprehensive admin panel. Users receive booking confirmation emails and can view their booking history and print tickets from their dashboard. The website features real-time seat availability updates and is fully responsive for seamless use on all devices.

The Reservation system should contain the following features:

1. If a passenger wants to reserve ticket(s), firstly, he/she has to log in to the Railway system with valid credentials. Then, the passenger has to provide his/her details with the date of the journey, names of the passengers and their details, origin station details, destination station details, and the class type of the required ticket(s).
2. The Railway Reservation System will provide the available Train-list, and Seat-availability, via-details.
3. To book a ticket passengers can pay through online/offline mode. After successful payment of the ticket fare the System will generate the ticket and PNR no. will be given to the passenger. The System also keeps the payment details and sends them to the system Admin.
4. The Passenger can check PNR status (confirmed, RAC, waiting list) by entering the PNR no. into the Reservation system.
5. The Reservation system should store all train details, fare details (by zone, class, and date wise), PNR no, date of trains, etc. This maintenance should be controlled by the Admin.
6. The System also has refund rules which have a date of reservation, ticket fare, and refundable percentage. The passenger can simply cancel the ticket(s) by entering the PNR no and a cancel ticket request. After cancellation, the admin will pass the refundable amount to the System and the System will give the refundable amount to the passenger.

5. The online flight reservation system enables users to search for flights by destination, date, and class, displaying available options with real-time seat availability. Users can register, log in, and manage their reservations via a personal dashboard. The booking process includes selecting flights, choosing seats, entering passenger details, and making secure payments through an integrated payment gateway. Admins can manage flight schedules, seat inventory, and user accounts using an advanced admin panel. Users receive booking confirmation emails with e-tickets and can view their booking history and

travel itineraries. The website is fully responsive, ensuring an optimal experience on all devices.The airline reservation system is a web-based system that helps in consolidating flight data - flight schedules, seat availability, flight fares and reservations from all airlines with the help of global distribution systems and provides real-time inventory and rates for customers and travel agents to book flight tickets online.

- Administrator User Login Page
- Forgot Password Page
- Search Flight Page

- Search Flight Page
- View Booking Status Page
- Print Ticket Page

6. The online cake ordering system allows users to browse a variety of cakes by category, flavor, and occasion, complete with detailed descriptions and images. Users can register, log in, and manage their orders through a personal dashboard. The ordering process includes selecting a cake, customizing options like size and message, entering delivery details, and making secure payments via an integrated payment gateway. Admins can manage cake inventory, track orders, and handle user accounts through an admin panel. Users receive order confirmation emails and can track delivery status. The website is fully responsive, providing a seamless shopping experience on all devices. Buy a Cake is a portal which allows admin in developing counters to advertise and sell their cake. This would permit rural communities to make their wares available to the rest of the world. The proposed system is to develop the website for cake store. User can buy the nearby cake available in app. An E Com App is a portal which allows admin in developing products to promote and sell their goods. This would permit rural communities to make their wares available to the rest of the world.

28.ArtistryHub is a beautifully designed portfolio website dedicated to showcasing the work and achievements of renowned artist Emily Harris. The website serves as a digital tribute and a comprehensive resource for fans and admirers. Key components include a visually stunning homepage featuring a gallery of Emily's most notable artworks, a detailed biography section highlighting her career milestones and exhibitions, and an interactive portfolio where users can view high-resolution images and descriptions of her artworks. The site also includes a blog for updates on recent projects and upcoming events, a store for purchasing prints and merchandise, and a contact page for booking inquiries and fan messages. ArtistryHub aims to celebrate Emily's artistic journey and provide an engaging experience for her audience.

INTERNET PROGRAMMING
LAB EXPRIMENTS

1. Homepage:
   - Create an engaging homepage that introduces visitors to the artist and sets the tone for the website.
   - Include an attractive banner image or artwork representative of the artist's work.
2. About the Artist:
   - Develop a page that offers a detailed biography or profile of the artist, including background information, influences, and artistic journey.
   - Include a high-quality photo or portrait of the artist.
3. Portfolio:
   - Organize and present the artist's work, such as artworks, music albums, or written pieces.
   - For visual artists, provide galleries with high-resolution images and descriptions of individual pieces.
   - For musicians, feature audio clips or embed music players for sample tracks.
   - For writers, display excerpts from books, articles, or poems.
4. Discography or Bibliography:
   - Create a comprehensive list of the artist's works, including albums, songs, books, articles, or any other significant creations.
   - Include publication or release dates and ISBN/UPC details, if applicable.
5. Media Gallery:
   - Incorporate a media section with photos, videos, interviews, or media coverage related to the artist.
   - If available, embed YouTube or Vimeo videos of live performances or interviews.

6.News and Updates (Optional):
   - Include a section for the latest news, updates, or events related to the artist, with announcements of upcoming exhibitions, concerts, or book releases.

7.Interactive Features (Optional):
   - Integrate social media feeds, allowing visitors to follow the artist's official profiles.
   - Enable users to subscribe to newsletters for artist updates.

28. **The layout of the event page will be simple. The header section will contain the names and images of the different speakers with links, the event venue, and the schedule. You must also include a section that describes the purpose of the event – what the event is for and which category of audience it aims to target. Section the page into smaller chunks to make it look neat. Choose the right font style, font color, and background color for individual sections on the page. Also, make sure to add a registration button so that interested people can register for the event.**

38. Gourmet Haven is a sophisticated website designed to enhance the digital presence of a fictional fine dining restaurant. It features a striking home page with a rotating carousel of the restaurant's ambiance and signature dishes, an interactive menu showcasing detailed descriptions and pricing, and an easy-to-use reservation system for booking tables. The site includes an "About Us" page detailing the restaurant's history and culinary team, a gallery of high-resolution images capturing the dining experience, and a contact page with essential information and a contact form. Gourmet Haven aims to provide an engaging and user-friendly online experience, allowing potential customers to explore offerings, make reservations, and connect with the restaurant effortlessly

1.Homepage:

- Create an engaging and visually appealing homepage that reflects the restaurant's theme and atmosphere.
- Include high-quality images of the restaurant's interior, exterior, and signature dishes.
- Add a welcoming message or tagline to set the tone for the dining experience.

2.Menu Pages:

- Develop dedicated pages for the restaurant's menu items, organized by categories (appetizers, main courses, desserts, etc.).
- Include detailed descriptions of each dish, including ingredients and pricing.
- Integrate high-resolution images of the dishes to entice visitors.
- Implement navigation to easily switch between different menu categories.

3.Contact Information:

- Create a separate page for contact information, including the restaurant's physical address, phone number, and email address.
- Embed an interactive Google Maps widget displaying the restaurant's location.
- Include a contact form to allow customers to submit inquiries, reservations, or feedback.

4.Reservation System:

- If desired, implement an online reservation system that allows visitors to book a table.
- Include a calendar for selecting dates and times, along with the number of guests.

5.About Us Page:

- Develop a page that provides background information about the restaurant, such as its history, concept, and culinary philosophy.
- Include images of the chef and the kitchen staff, along with their brief bios.

6.Special Offers and Events:

- If applicable, create a section for special promotions, events, or seasonal menus.
- Include details of ongoing deals, happy hours, or upcoming celebrations.

7.Testimonials and Reviews:

- If available, showcase customer testimonials and reviews to build trust and credibility.
- Include snippets of feedback from satisfied patrons.

INTERNET PROGRAMMING
LAB EXPRIMENTS

39. user visits an online store that features a clean and straightforward product catalog, allowing them to easily browse and purchase items. The homepage displays a selection of featured products along with categories for quick navigation. Each product listing includes a clear image, description, price, and available options such as size or color. Users can add items to their shopping cart with a single click and view their cart at any time to adjust quantities or remove items. The website also includes a search bar for finding specific products and a filter option to refine results by price, brand, or popularity. Once the user is ready to check out, they can proceed to a secure checkout page where they enter shipping and payment details. The website also provides an order summary and confirmation, with the option to track their order status through their account.

1.Homepage:

- Design a visually appealing homepage that introduces the online store and showcases featured products.
- Include a search bar, navigation menu, and clear calls to action to encourage users to explore the product catalog.

2.Product Listings:

- Create individual pages for each product, complete with product descriptions, images, pricing, and availability status.
- Organize products into categories (e.g., electronics, clothing, accessories) for easy navigation.
- Implement filters or sorting options to allow users to refine their product search.

3.Shopping Cart:

- Develop a shopping cart system that allows users to add products, view the contents of their cart, and adjust quantities.
- Calculate and display the total price of items in the cart.
- Provide options to remove items from the cart and clear the cart entirely.

4.User Accounts (Optional):

- Create user accounts that enable users to save their shipping and billing information for future purchases.
- Allow registered users to view their order history and check the status of their orders.

5.Checkout Process:

- Design a simple and intuitive checkout process that collects necessary customer information.
- Include a secure payment gateway to process payments for purchased items.

6.Order Confirmation and Email Notifications:

- Send order confirmation emails to customers after they complete a purchase.
- Provide email notifications to users about the status of their orders, including shipping and delivery updates.

40. A travel enthusiast creates a travel blog website to document and share their adventures with a global audience. The homepage features an attractive layout with stunning travel photos and a map highlighting visited destinations. Each blog post offers an immersive experience, with detailed narratives, captivating images, and travel tips for various locations. Readers can easily navigate through categories such as destinations, travel guides, food experiences, and cultural insights. The website includes a comment section for readers to share their thoughts, ask questions, and connect with the blogger. An "About" page gives insights into the blogger's

journey and passion for travel, while a "Resources" section provides useful travel tools, packing lists, and booking recommendations. The platform also integrates social media sharing options, allowing readers to easily share posts and follow the blogger's adventures in real time.

1.Homepage:

- Create an inviting homepage that showcases recent or featured travel articles.
- Include a visually appealing header with a site logo and navigation menu for easy access to various sections.

2. Blog Articles:

- Develop individual blog articles that narrate your travel adventures.
- Each article should include text content, high-quality images, and possibly videos.
- Implement a clean and readable layout for articles, including headings, paragraphs, and captions.

3.Travel Destinations:

- Organize your blog posts by travel destinations or regions.
- Allow users to explore your articles by filtering them based on specific locations.

4.Interactive Map:

- Integrate an interactive map that displays markers for the locations you've visited.
- Clicking on a marker should lead users to the respective travel articles related to that location.

5.Photo Galleries:

- Create photo galleries within your articles to showcase your travel photos.
- Include features for users to view photos as slideshows or open them in larger formats.

6.User Comments and Engagement:

- Implement a comment section on each blog post, encouraging reader engagement and discussions.
- Enable social media sharing for each article to expand your blog's reach.

7.About the Traveler:

- Dedicate a page to introduce yourself, including your background, travel interests, and future plans.
- Include a photo and brief biography.

41. A user visits the digital recipe book platform to explore and share culinary creations. The homepage features a curated collection of popular recipes, categorized by cuisine, dietary preferences, and difficulty levels. Users can search for specific recipes or browse through themed collections. Each recipe page includes a detailed list of ingredients, step-by-step instructions, and high-quality visuals to guide the cooking process. Users can create personal accounts to save their favorite recipes, upload their own creations, and even customize the ingredients based on serving size or dietary needs. The platform also allows users to rate and comment on recipes, fostering a community of food enthusiasts. Additionally, a meal planner tool helps users organize their weekly menus, while an integrated shopping list feature makes it easy to gather the necessary ingredients.

1.User-Friendly Interface:

- Design a user-friendly and visually appealing interface that makes it easy for users to browse and search for recipes.
- Implement a clean and organized layout with intuitive navigation.

2.Recipe Listings:

- Create an extensive database of recipes, organized into categories or tags (e.g., breakfast, main course, desserts, vegetarian).
- Include a search bar for users to quickly find recipes based on keywords or ingredients.

3.Recipe Pages:

- Each recipe page should feature a high-quality image of the prepared dish.
- Include detailed cooking instructions, a list of ingredients, preparation time, and servings.
- Allow users to add their own reviews and ratings.

4.Cooking Instructions:

- Provide step-by-step cooking instructions, including specific measurements and techniques.
- Add tips, variations, and cooking notes for each recipe.

5.Ingredients List:

- Include a list of ingredients with their quantities and measurements, making it easy for users to create shopping lists.

6.Recipe Search and Filter:

- Implement advanced search and filtering options, enabling users to refine recipe searches by dietary restrictions, cooking time, or cuisine.

7.User Accounts (Optional):

- Allow users to create accounts, save their favorite recipes, and submit their own recipes.
- Implement features for users to customize serving sizes and generate ingredient lists accordingly.

8.Comments and Discussions:

- Integrate a comments section for users to leave feedback, ask questions, or share their cooking experiences.
- Encourage a sense of community and collaboration among users.

9.Print and Share:

- Enable users to print recipes in a formatted and printer-friendly layout.
- Include social media sharing options for users to share their favorite recipes with friends and family.

42. A customer visits the online electricity bill payment website to conveniently manage their electricity payments. After logging in, they are directed to the dashboard, where they can view their current bill amount, due date, and payment history. The customer enters their payment details, selects a preferred payment method (e.g., credit card, debit card, net banking, or digital wallet), and confirms the transaction. Upon successful payment, a receipt is generated, which can be downloaded or emailed. The website also offers options for setting up automatic payments and sending bill reminders via SMS or email.
